b
α-Tocopherol
Chlorogenic acid
Kaempferol
Quercetin
Rutin
β-Sitosterol
Niazirin
Oleic acid
Astragalin
Moringin
Phytol
Glucomoringin
Niazimicin
Acetylated moringin (4'-O-acetyl)
Niaziminin
O-Ethyl rhamnosyloxybenzyl carbamate
Isoquercitrin
Palmitic acid
apoptosis
cell cycle
dna damage
dna repair
other
oxidative phosphorylation
oxidative stress response
proliferation
Complement
KRAS signaling up
Oxidative phosphorylation
P53 pathway
UV response down
UV response up
Evidence level
Ionising radiation
Process without radiation
Indirect
